

“Beer & Science” Tues, Nov 13, Conor O’Neils

Join our on-site seminar on *RNA functional analysis*
– learn from the experts

You’ve used RNA-seq to discover your variants of interest, now you need to carry out functional verification. Join our on-site seminar and find out how QIAGEN’s unique technologies for RNA functional analysis can accelerate your research!

QIAGEN’s Senior Life Science Specialist, Chuck Dokken, will walk you through RNA functional analysis and answer those challenging questions, including:

- How can I verify my miRNA/mRNA?
- How is LNA-enhanced technology going to help?
- Can QIAGEN support functional analysis in a model organism?

Our session is open to all, so please feel free to invite any interested colleagues. We look forward to meeting you! There is no charge to attend, however registration is required. Space is limited, so please be sure to reserve your spot.

Best regards,

QIAGEN in association with the
University of Michigan Center for RNA Biomedicine

QIAGEN presents:

“*BEER & SCIENCE*”
RNA functional analysis
over Pub Beer in Ann
Arbor

When:

Nov 13th, 5:00 p.m.

Where:

Conor O’Neil’s in
downtown Ann Arbor
